Why you must choose US ?

- ◆ Coverage in Remote Areas
- ◆ Freelancing drivers
- ◆ Cost-Effectiveness
- ◆ Speed and Efficiency

◆ User Scenarios

▶ Placing a Delivery Order

- User opens the application.
- User selects the "Place an Order" option.
- User enters the pick-up location and destination address.
- User specifies the type and size of the goods to be delivered.
- User adds any additional instructions or special requirements.
- User reviews the order details and confirms the request.
- The request is sent to available drivers.

▶ Driver Accepts a Delivery Request

- Driver receives a notification about an available delivery request.
- Driver opens the application.
- Driver views the order details, including the pick-up and destination addresses.
- Driver accepts the request if available and interested.
- The driver's location and estimated time of arrival (ETA) are shared with the user.
- The driver proceeds to the pick-up location.

Driver Picks up the Order

- The driver arrives at the pick-up location.
- The driver verifies the user's identity and collects the goods.
- The driver confirms the pick-up in the application

Driver Accepts a Delivery Request

- The driver navigates to the destination address using the application's built-in navigation system.
- The driver arrives at the destination.
- The driver verifies the recipient's identity, if required.
- The driver hands over the goods to the recipient.
- The driver confirms the successful delivery in the application.

User Tracks the Delivery

- User opens the application.
- User selects the "Track Delivery" option.
- User enters the order number or unique tracking code.
- User can view the real-time location of the driver on the map.
- User receives notifications about the delivery status, such as "Driver En Route," "Driver Arrived," or "Delivery Completed."

User Provides Feedback and Ratings

- After the delivery is completed, the user receives a notification to provide feedback.
- User opens the application and rates the driver's performance.
- User can leave additional comments or suggestions.
- The rating and feedback are recorded in the driver's profile.

Thank You
